

Request for Project Interest

March 21, 2025

The Center for Rural Affairs is collecting information on potential solar photovoltaic projects in Nebraska that are seeking financing and/or technical assistance. Projects may qualify for assistance under one of three programs: Solar for All, National Clean Communities Investment Fund, and Clean Communities Investment Accelerator. Financing will generally be in the form of power purchase agreements, lease arrangements, or loans.

Solar developers, installers, utilities, communities, housing developers and others are all invited to use this form. Entities that have otherwise discussed their projects with Center staff informally are asked to complete the intake form.

The information gathered through this form will help us understand the level of interest, and move these programs forward to best meet the needs of Nebraskans. Your input is valuable, and we greatly appreciate your time and consideration in assisting us with this request.

This form will be available, and posted online, for at least 30 days.
