

SUSTAINABLE SOLAR EDUCATION PROJECT

State Planning to Bring Solar to Low- and Moderate-Income Residents
Worksheet

List possible program/policy ideas or strategies for LMI solar deployment in your state.

Select one promising idea for your state and circle it above. Briefly describe it.

How would your idea/strategy help overcome barriers for LMI solar deployment in your state?

What resources could you use to learn more about your idea/strategy and its likelihood of success? What research, if any, could be conducted to assist you in your assessment?

Are there other states or jurisdictions you can learn from that have executed a similar idea/strategy?

What hurdles might your state face in instituting and implementing your idea/strategy?

What steps could you take to help ensure the success of your idea/strategy?

Which stakeholders (groups or individuals) would it be helpful to engage in moving your idea/strategy forward?

Which organizations or entities would be responsible for the implementation, administration, and carrying out of your idea/strategy?

What would be a projected timetable for implementation?

What is your estimated budget for your idea/strategy?

How could it be funded?

What criteria or metrics could be used to evaluate the success of your idea/strategy after it has been implemented?

What are the next steps to carry your idea forward? What can you do in your capacity to move your idea/strategy forward?

What, if any, could CESA do to be helpful in moving your idea/strategy forward?
